	Carer recognises the	The accommodation smells of damp and	visible, and house smells.

	importance of the home conditions to the child's sense of well-being, but is hampered by personal circumstances.	there is evidence of mould.	The accommodation smells strongly of damp and there is extensive mould which is untreated and the carer is hostile to advice about the impact of the home circumstances on child's wellbeing.
Stability of housing			
Child has stable home environment without too many moves (unless necessary). Carer understands the importance of stability for child.	Child has a reasonably stable home environment, but has experienced house moves/ new adults in the family home. Carer recognises that this could impact on child, but the carer's personal circumstances occasionally impact on this.	Child does not have a stable home environment, and has either experienced lots of moves and/or lots of adults coming in and out of the home for periods of time. Carer does not accept the importance of stability for child.	Child experiences lots of moves, staying with relatives or friends at short notice (often in circumstances of overcrowding leading to children sleeping in unsuitable circumstances). The home has a number of adults coming and going. Child does not always know these adults who stay over. Carer is hostile about being told
			about the impact on child of instability.
Child's Clothing	I		
Child has clothing which is clean and fits appropriately. Child is dressed appropriately for the weather and carers are aware of the importance of appropriate clothes for the child in an age appropriate way.	Child has clothes which are appropriate, but are sometimes poorly fitting, unclean and crumpled. The carer gives consideration to the appropriateness of clothes to meet the needs of the child in an age appropriate way, but their own personal circumstances can get in the way.	Child has clothing which is dirty and crumpled, in a poor state of repair and not well fitting. The child lacks appropriate clothes for the weather and does not have sufficient clothing to allow for regular washing. Carer(s) are indifferent to the importance of appropriate clothes for the child in an age appropriate way.	Child has clothes which are filthy, ill-fitting and smelly. The clothes are usually unsuitable for the weather. Child may sleep in day clothes and is not provided with clean clothes when they are soiled. The carer is hostile to advice about the need for appropriate clothes for the well-being of the child.
Animals			
Animals are well cared for and do not present a danger to children or adults.	Animals look reasonably well cared for, but contribute to a sense of chaos in the house.	Animals not always well cared for or ailments treated.	Animals not well cared for and presence of faeces and urine in living areas.
Children are encouraged to behave		Presence of faeces or urine from animals	Animals dangerous and chaotically looked

appropriately towards animals.	Animals present no dangers to children or adults and any mistreating of animals is addressed.	not treated appropriately and animals not well trained. The mistreatment of animals by adults or children is not addressed.	after. Carers do not address the ill treatment of animals by adults or children.
Hygiene			
The child is clean and is either given a bath/washed daily or encouraged to do so in an age-appropriate way.	The child is reasonably clean, but the carer does not bath/wash the child regularly	The child looks unclean and is only occasionally bathed/ washed or encouraged to do so in an age-appropriate	The child looks dirty, and is not bathed or washed or encouraged to do so.

Carer ensures child completes any		nome visits are carried out.	optical not attended to, immunisations not up

agreed programme of medication or treatment.	Immunisations are delayed, but eventually completed. Child is not consistently brought to appointments. Carer is inconsistent about ensuring that the child completes any agreed programme of medication or treatment, but does recognise the importance to the child, but personal circumstances can get in the way.	Child was not brought to two or more appointments (of any type: routine or specialist). Carer does not ensure the child completes any agreed programme of medication or treatment and is indifferent to the impact on child's wellbeing.	to date, even if a home appointment is offered. Carer does not ensure that the child completes any agreed programme of medication or treatment and is hostile to advice about this from others, and does not recognise likely impact on child.
Disability and illness			
Carer positive about child's identity and values him/her. Carer complies with needs relating to child's disability. Carer is proactive in seeking appointments and advice and advocating for the child's well-being.	Carer does not always value child and allows issues of disability to impact on feelings towards the child. Carer is inconsistent in their compliance with needs relating to child's disability, but does recognise the importance to the child, but personal circumstances get in the way. Caregiver accepts advice and support but is not proactive in seeking advice and support around the child's needs.	Carer shows anger and frustration at child's disability. Often blaming the child and not recognising identity. Carer does not ensure compliance with needs relating to child's disability, and there is significant minimisation of child's health needs. The carer does not seek or accept advice and support around the child's needs, and is indifferent to the impact on the child.	Carer does not recognise child's identity and is negative about child as a result of the disability. Carer does not ensure compliance with needs relating to child's disability, which leads to deterioration of the child's well-being. Carer hostile when instructed to seek help for the child, and is actively hostile to any advice or support around child's disability.

AREA 3: SAFETY AND SUPERVISION

1) Child-focused care-giving.	2) Adult-focused care- giving.	3) Child's needs are secondary to adults.	4) Child's needs are not considered.
Safety awareness and features			
Carer aware of safety issues and there is evidence of safety equipment use and maintenance.	Carer is aware of safety issues, but is inconsistent in use and maintenance of safety equipment, and allows personal circumstances to get in the way of consistency.	The carer does not recognise dangers to child and there is a lack of safety equipment, and evidence of daily dangers to the child. Carer indifferent to advice about this and does not recognise or acknowledge the impact on the child.	Carer does not recognise dangers to the child's safety and hostile to advice regarding this, does not recognise the importance to the child, and can hold child responsible for accidents and injuries.
Supervision of the child			
Appropriate supervision is provided in line with age and stage of development. Carer recognises the importance of appropriate supervision to child's wellbeing.	Variable supervision is provided both indoors and outdoors, but carer does intervene where there is imminent danger. Carer does not always know where child is and inconsistent awareness of safety issues when child away from home. Shows concern about when child should be home. Carer aware of the importance of supervision, but does allow personal circumstances too impact on consistency.	There is very little supervision indoors or outdoors and carer does not always respond after accidents. There is a lack of concern about where child is or who they are with and the carer is inconsistently concerned about lack of return home or late nights. Carer indifferent to importance of supervision and to advice regarding this from others.	Complete lack of supervision. Young children contained in car seats/pushchairs for long periods of time. The carers are indifferent to whereabouts of child, and often do not know where child is or who they are with, and are oblivious to any dangers. There are no boundaries about when to come home or late nights. Carer hostile about advice from others regarding appropriate supervision and does not recognise the potential impact on children's wellbeing.
Handling of baby/response to bab	-		
Carer responds appropriately to the baby's needs and is careful whilst	The carer is not always consistent in their responses to the baby's	Carer does not recognise the importance of responding consistently to the needs	Carer does not respond to the needs of the baby and only addresses issues when carer

Where risky behaviour occurs it is identified and responded to appropriately by the carer.	The carer is aware that the adolescent needs appropriate care but is inconsistent in providing it. Where risky behaviour occurs the carer responds inconsistently to it.	respond appropriately.	adolescent is still in need of guidance with protection from risky behaviour i.e. lack of awareness of the adolescent's whereabouts for long periods of time or seeking to address either directly or by seeking support of risky and challenging behaviour. The carer does not have the capacity to be alert to and monitor the adolescent moods for example recognising depression which could lead to self-harm.
Traffic awareness and in-car safe	ty		
Baby/Infant is well secured in pram/pushchair. Where a toddler is walking their hand is held safely. 3 – 5 yrs old are allowed to walk without holding hands, but are close and in vision. 5- 8 yr olds are allowed to cross with 13+ year old. Child taught traffic skills as per developmental needs.	Baby/infant not always secured in pushchair and 3- 5 year old not fully supervised. 7yrs onwards are allowed to cross with another young child alone and 8 yrs old crosses regardless of suitability. Child given some guidance about traffic skills.	Baby/infant not secured in pushchair and 3- 5 year old dragged along with annoyance or left to follow behind alone, with supervision. Under 7s onwards are allowed to cross road alone. Child not taught traffic skills.	Babies/infants are unsecured in pram/pushchair and carer is careless with pram. There is a lack of supervision around traffic and an unconcerned attitude. Lacks understanding of why teaching traffic skills might be important for the child.

AREA 4: LOVE AND CARE

1) Child-focused care-giving.	2) Adult-focused care-giving.	3) Child's needs are secondary to adults.	4) Child's needs are not considered.
Parent/carer's attitude to child, w	varmth and care		
Carer talks warmly about the child and is able to praise and give appropriate emotional reward. The carer values the child's cultural identity and seeks to ensure child	Carer talks kindly about the child and is positive about achievements most of the time but allows their own difficulties to impact. Carer recognises that praise and	Carer does not speak warmly about the child and is indifferent to the child's achievements. Carer does not provide praise or reward and is dismissive of praise from others.	Carer speaks coldly and harshly about child and does not provide any reward or praise and is ridiculing of the child when others praise. Carer is hostile to advice about the importance of praise and reward to the child.
develops a positive sense of self. Carer responds appropriately to child's needs for physical care and positive	reward are important but is inconsistent in this. Carer recognises child's cultural	Carer does not recognise the child's cultural identity and is indifferent to the importance of ensuring that the	Carer hostile to the child's cultural identity and to the importance of ensuring that the child develops a positive sense of self.
The emotional response of the carer is one of warmth. Child is listened to and carer responds	identity and is aware of the importance of ensuring child develops a positive sense of self, but sometimes allows personal circumstances to impact on this.	child develops a positive sense of self Carer seldom initiates interactions with the child and carer is indifferent if child attempts to engage for pleasure, or seek physical closeness.	Carer does not show any warmth or physical affection to the child and responds negatively to overtures for warmth and care.
appropriately. Child is happy to seek physical contact and care.	Child is main initiator of physical interaction with carer who responds inconsistently or	Emotional response is sometimes brisk or flat and lacks warmth.	Responds aggressively or dismissively if child distressed or hurt. Carers will respond to incidents of harm if they consider themselves to be at risk of
Carer responds appropriately if child distressed or hurt. Carer understands the importance of	passively to these overtures. Child not always listened to and carer angry if child seeks comfort	Can respond aggressively or dismissively if child distressed or hurt. Carer indifferent to advice about the	involvement with the authorities. The emotional response of carers is harsh, critical and lacking in any warmth.
consistent demonstrations of love and care.	through negative emotions such as crying. Does not always respond	importance of love and care to the child.	Carer hostile to advice about the importance of responding appropriately to the child.
	appropriately if child distressed or hurt Carer understands the importance of		

	demonstrations of love and care, but own circumstances and difficulties sometimes get in the way.		
Boundaries			
Carer provides consistent boundaries and ensures child understands how to behave and to understand the importance of set limits. Child is disciplined appropriately with the intention of teaching proactively.	Carer provides inconsistent boundaries and uses mild physical and moderate other sanctions. The carer recognises the importance of setting boundaries for the child, but is inconsistent because of own personal circumstances or difficulties.	Carer provides few boundaries, and is harsh and critical when responding to the child's behaviour and uses physical sanctions and severe other sanctions. Carer can hold child responsible for their behaviour. Carer indifferent to advice about the need for more appropriate methods of disciplining.	Carer provides no boundaries for the child and treats the child harshly and cruelly, when responding to their behaviour. Carer uses physical chastisement and harsh other methods of discipline. Carer hostile to advice about appropriate methods of disciplining.
Adult arguments and violence	,		
Carers do not argue aggressively and are not physically abusive in front of the children.	Carers sometimes argue aggressively in front of children, but there is no physical abuse of either party.	Carers frequently argue aggressively in front of children and this leads to violence.	Carers argue aggressively frequently in front of the children and this leads to frequent physical violence.
Carer has a good understanding of the impact of arguments and anger on children and is sensitive to this.	Carer recognises the impact of severe arguments on the child's wellbeing but personal circumstances sometimes get in the way.	There is a lack of awareness and understanding of the impact of the violence on children and carers are indifferent to advice regarding this.	There is indifference to the impact of the violence on children and carers are hostile to advice about the impact on children.
Young caring			
Child contributes to households tasks as would be expected for age and stage of development.	Child has some additional responsibilities within household, but these are manageable for age and stage of development and do	Child has onerous caring responsibilities that interfere with education and leisure activities.	Child has caring responsibilities which are inappropriate and interfere directly with child's education/leisure opportunities.

Does not take on additional caring responsibilities. Carer recognises the importance of appropriateness regarding caring responsibilities.	not interfere with child's education and interfere minimally with leisure/sporting activities. Carer recognises that the child should not be engaged in inappropriate caring responsibilities but is inconsistent in their response.	Carer indifferent to impact on child.	This may include age inappropriate tasks, and /or intimate care. The impact on the child's well-being is not understood or acknowledged. Carer is hostile to advice about the inappropriateness of caring responsibilities.
Positive Values			
Carer encourages child to have positive values, to understand right from wrong, be respectful to others and show kindness and helpfulness. Carer understands importance to child's development. This includes an awareness of smoking, underage drinking and drug misuse as well as early sexual relationships. Carer gives clear advice and support. Carer ensures child does not watch inappropriate films/TV or play with computer games which are inappropriate for child's age and stage of development.	Carer inconsistent in helping child to have positive values, to understand right from wrong, be respectful to others and show kindness and helpfulness. Carer aware of importance to child's development, but not always able to impost framework. Carer has variable awareness of smoking, underage drinking and drug misuse as well as early sexual relationships. Carer gives some advice and support. Carer aware of need to monitor child watching inappropriate material and playing inappropriate computer games, but is inconsistent in monitoring because of own personal difficulties and circumstances.	Carer does not teach child positive values. Is indifferent to issues of right and wrong, kindness and respect to others. Carer does not understand importance to child's development. Carer gives little advice about smoking, underage drinking and drug misuse as well as early sexual relationships. Carer does not monitor the watching of inappropriate materials or playing inappropriate games and is indifferent about the impact on the child.	Carer actively encourages negative values in child and has at times condoned anti-social behaviour. Carer indifferent to the impact on child's development. Carer indifferent to smoking, underage drinking and drug misuse, and early sexual relationships. No advice given, and may, at times, have encouraged some of these activities. Carer(s) allows child(ren) to watch inappropriate TV /film material and inappropriate computer games. Is hostile to advice about inappropriateness and to the impact on child (s) wellbeing.

Adult behaviour			
Carer does not talk about feelings of depression /low mood in front of the children and is aware of potential impact. Carer does not misuse drugs or alcohol.	Carer does discuss feelings of depression and low mood, but does not discuss suicide and is aware of the impact of parental mood on children, but their own mood or circumstances means there is inconsistency in awareness of this. Carer uses drugs and alcohol, but ensures that this does not impact on child.	Carer talks about depression and suicide in front of child and is unaware of potential impact on child. Carer indifferent to advice about the importance of not talking about this issue. Carer misuses drugs and/or alcohol, and is not aware of impact on child.	Caregiver has attempted suicide in front of child. Carer can hold the child responsible for feelings of depression and is open with the child and/or others about this. Carer is hostile to advice focussed on stopping this behaviour and carer does not recognise the impact on the child. Carer misuses drugs and alcohol and does not ensure that this does not impact on the child and this impacts on safety and wellbeing. Carer hostile to advice about this.
Substance misuse			carer riostile to davice about tris.
Alcohol and drugs are stored safely, if in the home.	The carer believes it is normal for children to be exposed to regular alcohol and substance use.	The carer lacks awareness of the impact their substance use has on their child and is inconsistent in their	The carer holds the child responsible for their use & blames their continual use on the child.
The carer models low consumption or does not drink or use in front of the child. The carer's use does not impact on the child in terms of carer's emotional availability and provides consistency of care or they have physical ability to care or respond to the child.	The carer maintains boundaries and routines but these are changed and/or adapted to accommodate use at times. The carer understands the importance of hygiene, emotional and physical care of their child and arranges for additional support	engagement with specialist agencies. The carer's use leads to an inconsistency in caring and the child takes on inappropriate responsibilities at home. The carer needs support in order to manage their use during pregnancy and lacks awareness on the impact this	The carer significantly minimises and is hostile to advice around their use or refuses to acknowledge concerns. The carer involves the child in their using behaviour (i.e. asking the child to get the substances or prepare the substances). The carer refuses antenatal care or does not attend care offered.
The carer is able to respond to emergency situations should they arise appropriately. The carer talks appropriately about substances to the child, being aware of the child's development, age and understanding.	arranges for additional support when unable to fully provide for the child. Finances are affected but the child's needs are generally met. The mood of the carer can be irritable or distant at times.	and lacks awareness on the impact this may have on their baby in terms of immediate and medium to long term future. Substances can be accessed by the child. The child's access to appropriate	attend care offered. The carer cannot respond to the child's needs or shows little awareness of the child's wellbeing (i.e. attending school) There is an absence of supportive family members or a social network. The child is exposed to abusive or frightening

others are involved.			

AREA 5: STIMULATION & EDUCATION

1) Child-focused care-giving.	2) Adult-focused care-giving.	3) Child's needs are secondary to adults.	4) Child's needs are not considered.
Unborn			
The mother acknowledges the pregnancy and seeks care as soon as the pregnancy is confirmed. The mother attends all her antenatal appointments and seeks medical advice if there is a perceived problem. Parents prepare for the birth of the baby and have the appropriate clothing, equipment and cot in time.	The mother attends antenatal clinic and prepares for the birth of her baby, but she is acutely aware of her mental health or substance misuse problems which could negatively impact on her unborn baby. If there is one, the partner attends some but not all antenatal appointments.	The parents are unaware of the impact their mental health and/or substance misuse problems could have on the unborn child. Mother cancels or fails to attend more than one antenatal appointment. Hostility or negativity expressed towards pregnancy from one partner or both. Parents are not indicating through their behaviours that they are preparing mentally or emotionally for the arrival of their baby.	The mother does not attend any antenatal clinic appointments; she ignores medical advice during the pregnancy. Parents have nothing prepared for the birth of their baby. Parents engage in activities that could hinder the development, safety and welfare of the unborn. Their lifestyle or behaviour does not reflect any understanding of the impact a new baby will have on their life.
0-2 years			
The child is well stimulated and the carer is aware of the importance of this.	There is inadequate stimulation and the baby is left alone at times because of carer's personal circumstances and this leads to inconsistent interaction. Carer is aware of the importance of stimulation, but is inconsistent in response.	The carer provides the baby with little stimulation and the baby is left alone unless making serious and noisy demands.	The carer does not provide stimulation and the baby's mobility is restricted (confined in chair/pram). Carer gets angry at the demands made by the baby. Carer hostile to advice about the importance of stimulation and paying attention to the baby's needs for attention and physical care.

The child receives appropriate stimulation such as carer talking to the child in an interactive way, as well as reading stories and the carer playing with the child.

Carer provides all toys that are necessary. Finds a way even if things are unaffordable (uniform, sports equipment, books etc).

Outings: Carer takes child to child centred places locally such as park, or encourages child in an age appropriate way to make use of local resources.

The carer provides adequate stimulation. Carer's own circumstances sometimes get in the way because there are many other demands made on the carer's time and there is a struggle to prioritise. However, the carer does understand the importance of stimulation for the child's well-being.

The child has essential toys and the carer makes an effort to ensure appropriate access to toys even if things are unaffordable, but sometimes struggles.

Outings: Child accompanies carer wherever carer decides, usually child friendly places, but sometimes child time taken up with adult outings because of carers needs.

The carer provides little stimulation and does not see the importance of this for the child.

The child lacks essential toys, and this is not because of financial issues, but a lack of interest or recognition of the need.

Carer allows presents for the child but the child is not encouraged to care for toys.

Child may go on adult oriented trips, but these are not child centred or child left to make their own arrangements to plays outdoors in neighbourhood.

Child has responsibilities in the house that prevents opportunities for outings.

No stimulation is provided and carer hostile to child's needs or advice from others about the importance of stimulation.

The child has no toys and carer may believe that child does not deserve presents. No toys, unless provided by other sources, gifts or grants and these are not well kept.

No outings for the child, may play in the street but carer goes out locally e.g. to pub with friends.

Child prevented from going on outings with friends or school.

School

Carer takes an active interest in schooling and support at home, attendance is regular.

Carer engages well with school or nursery and does not sanction missed days unless necessary.

Carer encourages child to see school as important.
Interested in school and support for homework.

Carer maintains schooling but there is not always support at home.

Carer struggles to link with school, and their own difficulties and circumstances can get in the way.

Can sanction days off where not necessary.

Carer understands the importance of school, but is inconsistent with this and there is also inconsistency in support for homework.

Carer makes little effort to maintain schooling.

There is a lack of engagement with school. No interest in school or homework.

Carer does not recognise child's need for education and is collusive about child not seeing it as important. Carer hostile about education, and provides no support and does not encourage child to see any aspect positively.

Total lack of engagement and no support for any aspect of school such as homework, outings etc.
